## French

### **Preamble:**

In today's world, speaking one foreign language is not enough. Students who speak several languages will increase their chances of finding a job, whether at home or abroad. Learning another language enriches the mind and opens up new horizons, both personal and professional. French is, along with English, the only language spoken on all five continents. More than 220 million people speak French on all the five continents. French is a major language of international communication. It is the second most widely learned language after English and the sixth most widely spoken language in the world. French is also the second most widely taught language after English, and is taught on every continent. The ability to speak both French and English is an advantage for finding a job with the many multinational companies using French as their working language, in a wide range of sectors (retailing, automotive, luxury goods, aeronautics, etc.). Learning French also introduces the students to an incomparable cultural universe and access to the great works of literature, arts and architecture.

### **Objectives:**

1. To familiarize the learner with the functional aspects of the language
2. To equip the learner with the range of lexical resource through a variety of exercises
3. To develop the learner's ability to communicate in French in the four primary skills of reading, writing, listening and speaking
4. To enhance the learner's language proficiency by providing adequate exposure to reading and writing skills

**Learning Outcome:** After successful completion of the course, the learner should be able to enhance his/her communication skills in French to meet the challenges of the professional world and achieve success in his/her inter-personal and group communication.
